

Contract manufacturer of innovative, life-enhancing medical devices

Our **Value Proposition**

Experience
in the medical
device market

We are your partner of choice for long-term relationships, understand the stringent demands of the market and are agile in our project management and responsiveness.

Flexibility
to meet partner
requirements

We address both small and large product runs, and provide solutions to complex challenges with a focus on providing quality, cost-effective products.

Responsive
to the needs of our
partners

We are committed to finding the optimal solutions for all our partner's needs, from development and manufacture to packaging, labeling, branding, logistics and warehousing.

Cost-effective,
central European
location

We are located in the Slovak Republic, a cost-effective location close to key European markets with a culture of professionalism and expertise in production at competitive prices.

Our Services

Our contract manufacturing services are suitable for a wide range of customers, from individuals with creative ideas to large, multinational organizations seeking to grow their production capabilities. Constantly seeking to improve effectiveness, save you time and reduce your costs, our services include:

- **Product Development & Manufacturing** using the latest design technologies to deliver fully-integrated manufacturing applications.
- **Prototyping** to minimize design revisions and lead times.
- **Quality Assurance & Regulatory Affairs (ISO 13485 certified)** through rigorous quality management and risk assessment systems.
- **Testing** with a wide range of tools, measuring equipment, processes, validation procedures and maintenance programs.
- **Cleanroom Manufacturing, Assembly & Packaging** of a range of products, from single-use medical devices to the assembly of complex, integrated devices.
- **Packaging & Labelling** to ensure safe and reliable delivery of branded medical devices.
- **Sterilization of Products**, including the development and validation of sterilization processes.
- **Logistics & Warehousing** through traceability and supplier management systems for the storage and timely delivery of products.
- **Consultant Services** concerning the quality, regulatory issues and infrastructures relevant to medical devices.

About Sky Medical

Sky Medical is a contract manufacturer of medical devices, offering full-scale services from initial runs of prototypes to large volume production, including product assembly, packaging, sterilization, storage and logistics. Producing components and devices that will be used to save or enhance a patient's life, the company is committed to the highest quality standards. Sky Medical services are based on extensive experience and knowhow of more than 20 years in the medical device manufacturing and distribution market, enabling the company to be agile and responsive to OEM partner goals and needs.

Why Sky Medical?

Size

Small enough to be agile and responsive to OEM needs, we have access to capital, offer robust quality control and a global presence in a low-cost manufacturing region, enabling significant reductions in costs.

Production Focus

We deliver significant value through consolidated supply chains and integrated teams.

Quality

Our development and production services are based on robust, accredited quality systems in combination with risk mitigation plans.

Responsiveness & Communication

Our work is based on direct access to an appropriate point of contact throughout product development, manufacture and delivery.

Location

Central Europe enables us to significantly affect the price-per-unit, and provides easy and timely access to distribution channels.

Understand Your Goals

Our services enable you to reduce costs and wholly-owned space, creating flexible models for expansion.
